MEMORANDUM FOR: Chief, Support Staff, Counterterrorist Center

FROM: John M. Ray  
Director of Logistics

SUBJECT: Request for Work Space

REFERENCE: Memo to Chief, FMD/OL, from Chief, Support Staff,  
Counterterrorist Center, dtd 9 March 1988,  
Subj: Request for Work Space

25X1 1. The Headquarters compound has been functioning in a space deficit mode for the better part of two years, with no relief in sight until the [redacted] is completed in the 1991-1992 time frame. Our ability to find new quarters on the compound is virtually non-existent at this time. Current requests for Headquarters space are being managed, when possible, by moving elements to external space where we have some flexibility. If your contractors can function in external space, or if the Directorate of Operations (DO) wishes to move someone to external space to accommodate your request, we can help you. Barring this solution, we recommend that you canvass the DO divisions for room to house your two people.

25X1 2. I wish we could offer you more help than this, but your desire to satisfy this requirement on the compound limits our ability to do so at this time. We believe that we will be able to fit you in contiguous space in the original building in a couple of years when your turn in the renovation program comes up.
